ADULT Belt Ranking Chart

For any rank to be valid and recorded as official lineage in the PSBJJA through Master Sauer, the student must be registered as an active member in the PSBJJA. The instructor awarding the rank increase (degree or belt) must have the required priveledges at the various levels (see affiliate rank guidelines). These ranking priveledges are validated at their registered academy, but can be extended to other affiliated academies with proper certification and approval from the PSBJJA.

Rank Credits are designated as technique training or time spent receiving instruction and/or specifically drilling or working on techniques (sparring does not apply to rank credit) completed in any single day. ie: Multiple training sessions per day count as 1 rank credit.

Time requirements are only part of the requirements for achieving rank. Effective and precise demonstration along with the ability to execute technique during drilling and live sparring is also a pre-requisite.

Pedro Sauer Brazilian Jiu-Jitsu Association (PSBJJA, LLC)

Adult Ranking Metrics

Rank progression for adult students in the PSBJJA is based on a number of factors as outlined below. When using the affiliate management tools and programs provided to every affiliate and club, the collected data allows qualified instructors to make guided and educated decisions to progress students through the various ranks.

CREDITS

RANK CREDIT (RC) this is what counts towards rank progression designated as an awarded belt or degree on a belt.

1 rank credit = any training (that included instruction) completed in a day

Examples:

- A student attends three, 1hr classes in 1 day that had an instructor teaching techniques. This counts as 1 Rank Credit.
- A student attends a training camp that has 1 session on Friday, 2 sessions on Saturday and 1 session on Sunday. This counts as a total of 3 rank credits.. 1 for each of the days attending a training session.

CLASS CREDIT (CC) based on class participation

1 class credit = participation in any single class session

Examples:

- A student attends three, 1hr classes in 1 day that had an instructor teaching techniques. This counts as 3 Class Credits.
- A student attends a training camp that has 1 session on Friday, 2 sessions on Saturday and 1 session on Sunday. This counts as a total of 4 class credits.. 1 for each of the sessions attended

TIME

ACCUMULATIVE TIME (AT) this is the amount of time "days" during any specified period of training

Example:

- total accumulative = 5 years 5 days (regardless of class credits or rank credits)

ACCUMULATIVE TIME AT RANK (ATR) this is based off the amount of time spent at any belt rank

Examples:

- blue belt accumulative = 225 days (derived from):
  - blue belt 0 degree = 100 days
  - blue belt 1st degree = 115 days
  - blue belt 2nd degree = 10 days

HOURS TRAINING (HT) when tracking class from the affiliate scheduler, the time per class is and attended is collected. Additionally, outside class time can be added to a student record and approved by the affiliate.
